

The Dental Surgery Best Cosmetic Dental Practice 2019 - Norfolk

The Dental Surgery provides high quality general and cosmetic Dental care in modern state of the art surgeries. We profile the practice to find out more and explore the range of solutions it has to offer.

Established in 2000 by Dr Leon Khangura BDS London, the Dental Surgery is a private Denplan Excel accredited dental surgery based on Ipswich Road near Norwich city centre, with ample onsite parking.

The clinic offers a wide variety of treatments ranging from routine check-ups through to more complex cosmetic work, including veneers, crowns, bridges, implants and teeth whitening. Dr. L Khangura has always ensured the practice is equipped with cutting-edge surgeries, maintained to the

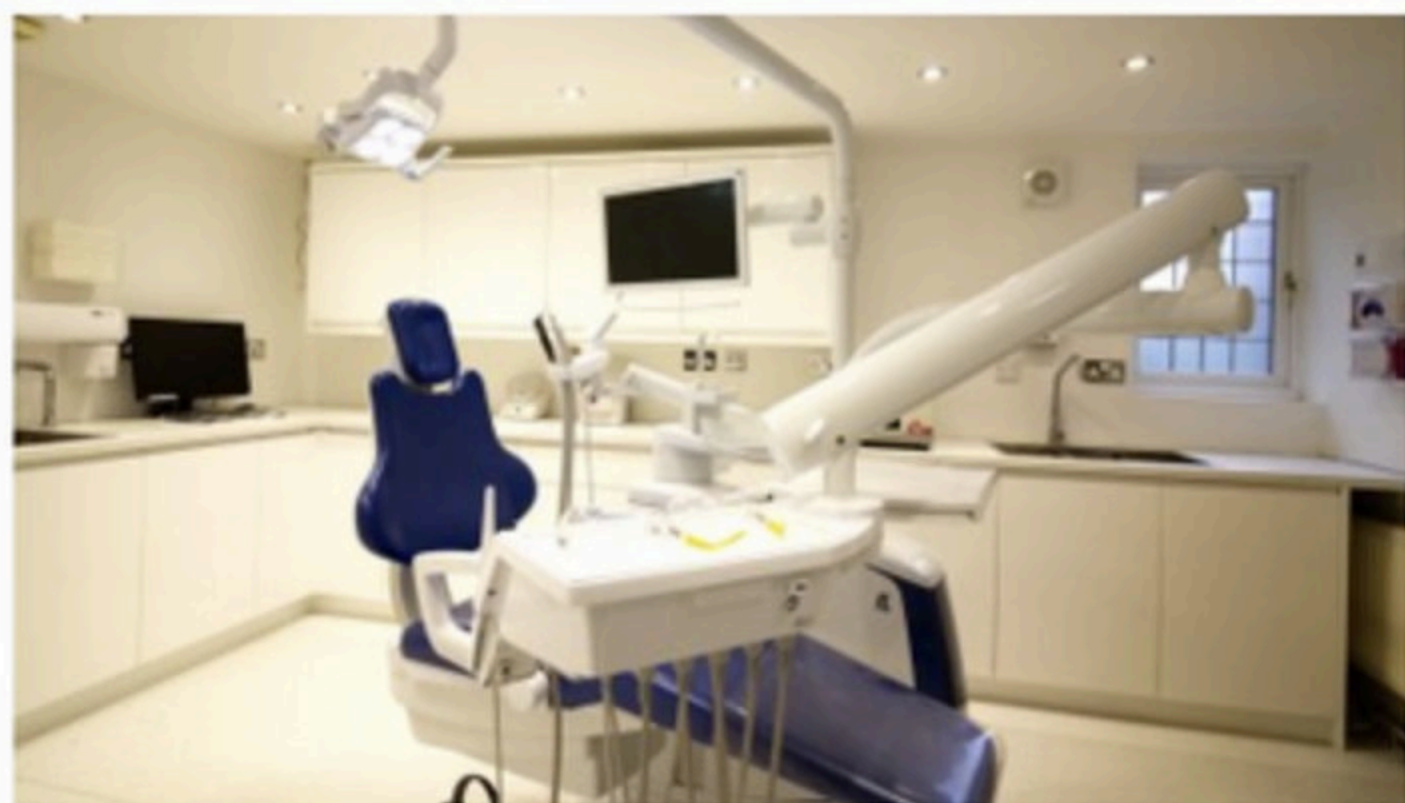

highest standards. Patients can relax in comfortable surroundings with friendly and caring staff. Founder Dr Khangura ensures all dental treatment is collaborative with his patients and that they are well-informed before treatment begins. As such, all patients can rest assured that they are in safe hands when they visit the Dental Surgery.

Alongside this wide range of dental services, the surgery also provides a range of quality facial aesthetic procedures including dermal fillers. These can be used to enhance lips and reduce the appearance of wrinkles.

Dr Khangura is one of a few cosmetic practitioners in East Anglia who is trained to carry out PRGF; a new state of the art procedure where the PRGF Endoret is injected into the middle layer (mesoderm) of the skin hence why it is referred to as "mesotherapy". It is placed either manually or mechanically using the state-of-the-art device which makes the procedure virtually painless and very fast. With this innovative technique it is possible to isolate, concentrate and extract

growth factors with proteins which are present in ourselves to repair our tissues naturally.

Overall, the Dental Surgery's main focus is to provide high quality dental care for each and every patient in a friendly and caring environment using up to date techniques incorporating the latest technology. This will then remain the practice's ongoing focus as it looks towards a bright and prosperous future.
